

Example 3: Larger School				
Average Number of Children:		1200		
Children that participate:		65%		
Participating Children:		780		
Number of Items donated per child:		1	or	2
Number of Items available for sale:		780	or	1560
Average number of items sold		65%		65%
Number of items 'sold'		507		1014
Sold at average price of	\$10	\$5,070		\$10,140
Sold at average price of	\$15	\$7,605		\$15,210
Sold at average price of	\$20	\$10,140		\$20,280

Using the above assumptions - A larger school could potentially raise between **\$5,070 - \$20,280**

- ★ If you happen to have left over donations you can:
 - Extend your fundraiser end date, continue the generosity and on-donate the goods to another charitable organisation: or
 - Simply store the items for your next GarageSaleIt Fundraiser!
- ★ Total Outlay to achieve above examples:
 - \$50
